EDUCATION

2022-2023

- GOVERNMENT GIRLS HIGHER SECONDARY SCHOOL

2023-2027

- PGP COLLEGE OF ENGINEERING AND TECHNOLOGY

SKILLS

- Firebase(Basic)
- Flutter(Basic)
- Python(Basics)
- Data Entry(Basics)
- communication

CERTIFICATIONS

- Nptel - Data Analytics with python
- python certificates
- web development(HTML,CSS, JavaScript
- Data Entry

LANGUAGES

- Tamil
- English

CONCLUSION

A motivated IT student with strong skills in Android and web development, eager to contribute technical knowledge and grow professionally in a dynamic organization

PROFILE

Motivated Information Technology student with basic skills in web and mobile app development using HTML, CSS, JavaScript, Flutter, and Firebase. Possesses foundational knowledge in Python and data handling, along with strong communication skills in Tamil and English. Developed projects such as a Lost and Found web application and a Student Management System, demonstrating practical experience in real-time databases and user-focused design. Eager to learn new technologies, contribute to innovative projects, and grow as a web and software developer.

PROJECTS

Lost and Found web Application using Firebase

- Developed a web-based Lost and Found application that allows users to post and search for lost or found items. Implemented dynamic item listing and search functionality using JavaScript. Integrated Firebase Firestore for real-time data storage and retrieval. Added user contact details (phone and email) for easy communication between users. Deployed the application using GitHub Pages for public access.

Student Management System using Flutter

- Developed a Student Grade Management System using Flask, a Python web framework, to efficiently manage and monitor student academic records. The system allows administrators to add, update, delete, and view student details and grades through a user-friendly web interface.

INTERNSHIP

1.New Technology institutions-UI/UX

- Supported UI/UX design process by researching user needs and creating simple design layouts.
- Created wireframes and prototypes using design tools while collaborating with the development team.

2.CodeBind Technologies-Digital Marketing

- Supported digital marketing activities including social media posting and content creation.
- Helped in promoting products/services through online platforms and tracking campaign performance.
